

# MCA of Chicago Industrial Section

## Purpose

Discuss areas of concern for contractors in the industrial market segment and develop appropriate programs and strategies.

## Section Members

Work in the industrial market. Seeking some familiar with Indiana work and laws. We continue to be supportive of streamlining testing for fitters, both on the drug and welding fronts.

## Things to Remember

UA  
Welding  
Certs.

We support owner acceptance of the UA Welding Certs.

Industry  
Advocacy.

Our tests will eventually be comparable to that of BCRC in northwest Indiana and Three Rivers Construction Alliance.

Drug test panels mirror industry standards.

Recently updated drug test panels mirror industry standards and bring us closer to reciprocity with other testing agencies and end users.

## Commitment

- Provide a forum for contractors that perform heavy industrial work in Illinois and Northwest Indiana, particularly in the refineries, mills and power plants, to discuss areas of mutual concern.
- Attend relevant meetings (typically twice per year).

## Goals

- Monitor work and manpower needs in the industrial area.
- Provide a forum for members to explore industrial interests.
